- Adobe After Effects

Experience

2023 Sept – 2024 Jan

IT Technician intern

Newles Technologies

As an IT intern at Newles Technologies, I undertook a multifaceted role maintaining websites of the company's clients, demonstrating proficiency in web development and content management. My responsibilities extended to an office administrator, effectively managing customer interactions. Additionally, I actively contributed to the success of various company's clients live streaming projects.

2022 – Now

Web developer

Freelancing

In my freelancing role, I undertook diverse web development projects that allowed me to create impactful solutions for a range of companies, including a security firm, construction, oil and logistics company, and an accountancy firm. I crafted websites that solved specific challenges, such as streamlining their services presentation and improved client communication. These experiences not only honed my technical skills but also deepened my understanding of tailoring digital solutions to address specific business challenges. As I created websites that bridged functionality with aesthetics, I continuously expanded my knowledge in web development while contributing to the success of diverse businesses.

Live websites I developed:

- CGT Associates Chartered Accountants
- Moeletsi Oa Basotho
- Khang and Khang Group (PYT)LTD
- Bulwark Security Service Limited

Education

2020 – Now

Associates Degree in Multi-media and Software Engineering

Limkokwing University of Creative Technology, Lesotho
